AGRO PAK FARMS (PRIVATE) LIMITED

SUSTAINABLE FARMING • BETTER FUTURE

SECP Inc. No. 0349477
FBR NTN: J616762 • Lahore, Pakistan

OFFICIAL CORPORATE PROFILE • 2026 EDITION

Pakistan's Institutional Partner for Livestock Supply, Cattle Fattening & Corporate Partnerships

Scientifically reared indigenous Pakistani breeds (Sahiwal, Cholistani, Red Sindhi & native small stock), conditioned under structured TMR nutrition & digital weighbridge protocols for licensed meat-exporting companies and corporate buyers.

Commercial Feedlot Operations — Punjab, Pakistan • Uniform Sahiwal & Cholistani Zebu Lots

01. B2B LIVESTOCK SUPPLY

Bulk, batch-uniform live fattened bulls & small ruminants supplied directly to licensed Pakistani meat-exporting companies and Halal processors.

02. CATTLE FATTENING

90–120 day scientific TMR weight-gain finishing with fermented maize silage, 18–20% CP concentrates, and digital weighbridge ADG tracking.

03. CORPORATE PARTNERSHIPS

Recurring exporter supply MOUs, managed contract cattle fattening programs, transparent live weighbridge verification & veterinary clearance.

Head Office: Office No. 212, 2nd Floor, Century Tower, Kalma Chowk, Lahore, Pakistan **Tel / WhatsApp:** +92 301 9161970 • **agropakfarms.com**

SECTION 01 • INSTITUTIONAL OVERVIEW

Upstream Corporate Livestock Partner to Meat Exporters

Agro Pak Farms (Private) Limited is a registered corporate agribusiness bridging Pakistan's richest livestock belt in Punjab with institutional meat-exporting companies, commercial processors, and grain mills.

Clear Business Positioning: We Supply Live Stock to Exporting Companies

Agro Pak Farms **does not export meat directly under its own label**. Instead, we operate as a specialized upstream corporate supplier — rearing, fattening, vaccinating, and weight-verifying healthy indigenous Pakistani cattle to fulfill recurring batch orders from **licensed meat-exporting companies, Halal export abattoirs, and institutional buyers**.

Why Meat Exporters Source From Us

Spot-buying in fragmented mandis leaves exporters vulnerable to uneven dressing yields, transport stress shrinkage, unrecorded vaccinations, and erratic lot volume. Our feedlot-conditioned batches deliver consistent carcass conformation, full health logs, and electronic weighbridge proof prior to dispatch.

Core Values & Corporate Ethos

QUALITY • CARE • COMMITMENT • SUSTAINABILITY.
Every holding pen enforces biosecure quarantine intake, scheduled FMD/HS immunization, clean concrete feed alleys, unlimited freshwater, balanced TMR rations, and zero hormonal adulteration.

STATUTORY AUTHORITY • MEMORANDUM OF ASSOCIATION

"Clause 3(i): The principal line of business of the company shall be to set-up and carry on the business of cattle rearers, sheep farmers, poultry farmers, graziers, breeding and to purchase, breed, rear, sell, import, export, improve, deal and trade in cattle, horses, asses, donkeys, mules, sheep, goats, birds, poultry, eggs, meat, milk and live and dead stocks of every description of live stock."

SECTION 02 • LIVESTOCK SUPPLY FOR MEAT EXPORTERS

Indigenous Pakistani Breeds Reared for Export-Grade Yield

We specialize exclusively in high-yielding indigenous Pakistani Bos indicus humped cattle and native small ruminants adapted to Punjab's climate and prized across GCC & Asian meat markets for lean meat texture and uniform cut recovery.

BATCH DISPATCH YARDS

Exporter-Ready Herd Lots

Sorted by weight bracket, ear-tagged, and health-inspected prior to truck loading.

SAHIWAL BEEF BULLS

High Muscle Conformation

Heavy hindquarters, glossy reddish coat, and 53–56% hot carcass dressing yield.

CHOLISTANI ZEBU BULLS

Resilient Desert Frame

Strong compensatory feedlot weight gain sourced from Punjab's pastoral corridors.

Pakistani Breed Line	Live Weight Bracket	Finishing Window	Primary B2B Buyer Application
Sahiwal Bulls & Steers	380 kg – 550 kg	90 – 120 Days Grain-Fed	Licensed chilled/frozen boneless beef exporting companies & abattoirs
Cholistani Bulls	360 kg – 500 kg	90 – 120 Days Feedlot	Export primal processors seeking clean trim & lean marbling balance
Red Sindhi & Dhanni Stock	340 kg – 460 kg	75 – 105 Days Conditioning	Institutional processors, regional meat packers & recurring contracts
Beetal Goats & Kajli / Lohi Rams	32 kg – 58 kg	60 – 90 Days Intensive	Export mutton/chevon suppliers, licensed slaughterhouses & seasonal trade

Traceability & Quarantine Protocol

Every incoming animal is numbered with a tamper-evident yellow ear tag, logged by baseline intake weight, isolated for 14-day biosecurity observation, drenched against parasites, and vaccinated against FMD & HS.

Reliable Dispatch & Volume Scheduling

Exporters receive forward batch availability schedules 30–45 days ahead of target slaughter dates, eliminating spot-market price spikes and supply shortages at your abattoir.

SECTION 03 • OPERATIONAL PROCESS TRANSPARENCY

Scientific Cattle Fattening: Precision Feeding & Digital Weighing

Predictable weight gain demands measured inputs and verified weights. Our Punjab feedlot pens run on precision TMR formulations, calibrated electronic cattle weighbridges, and resident veterinary supervision.

1.2 – 1.5 kg/d	90 – 120 Days	18% – 20% CP	Bi-Weekly
Target Average Daily Gain	Controlled Feedlot Cycle	Balanced Fattening Ration	Digital Weighbridge Audits

PROCESS 01 • PRECISION FEEDING

Automated Twice-Daily TMR & Silage Distribution

Clean concrete mangers are replenished at fixed feeding hours with freshly mixed anaerobic maize silage, wheat straw fiber, and our 18–20% crude protein beef concentrate (wanda), ensuring balanced intake and steady weight gain.

PROCESS 02 • DIGITAL WEIGHING

Calibrated Electronic Weighbridge & ADG Logs

Bulls step individually into our galvanized steel weighing crush equipped with load-cell digital readouts. Baseline, mid-cycle, and pre-dispatch weights are recorded per ear-tag ID, guaranteeing transparent B2B billing.

PROCESS 03 • VET WELFARE

Resident Veterinary Oversight

Scheduled immunization, vitamin/mineral boluses, and daily health inspections safeguard animal welfare and pre-dispatch export fitness.

PROCESS 04 • BIOSECURE HOUSING

Ventilated Steel-Truss Sheds

Uniform arrival weight grouping prevents feed bunk competition while spotless wide concrete alleys streamline daily sanitation.

SECTION 04 • INSTITUTIONAL COLLABORATIONS

Structured Corporate Partnerships & Backward-Integrated Feed Control

We collaborate under formal corporate contracts backed by SECP/FBR compliance, live weighbridge verification, and self-controlled forage & concentrate production.

B2B ACCOUNT MANAGEMENT

Dedicated Procurement Desk & Transparent Contracting

Monthly or quarterly forward supply agreements with fixed live-weight brackets, pre-agreed dispatch schedules, and clean tax invoicing.

Track A • Exporter Recurring Supply MOU

Reserved monthly headcount deliveries (50–500+ heads) conditioned strictly to your abattoir's target weight and carcass yield specs.

Track B • Custom Contract Cattle Fattening

Partner specifies breed & target weight; Agro Pak Farms executes quarantine, 90–120 day TMR finishing, veterinary care, and bi-weekly weighing.

Track C • Corporate Audits & Farm Inspections

Exporters and institutional QA officers are welcome to audit silage bunkers, vet logs, and electronic weighbridge grading on-site in Punjab.

IN-HOUSE FEEDS & GRAIN COMMODITY PILLAR

Corn Silage & Beef Concentrates

32–35% DM fermented maize silage (pH 3.8–4.2) plus hormone-free 18–20% CP wanda pellets supplied internally and wholesale.

Milling Wheat & Straw (Toori)

Machine-cleaned wheat (<12% moisture, <1% foreign matter) and dust-screened wheat straw bales for partner mills and feedlots.

Governance Feature	Buyer Assurance Standard
Weight Integrity	Calibrated electronic cattle scale readout witnessed or photographed per batch dispatch.
Zero Adulteration	Strictly free of banned hormones or urea adulteration — clean natural grain finishing for export meat quality.

SECTION 05 • ONBOARDING WORKFLOW

Partner With Us in Four Structured Steps

From initial specification brief and farm inspection to recurring weighbridge-verified cattle deliveries at your abattoir gate.

STEP 01

Submit Corporate Form

Share breed preference, weight bracket, monthly headcount, and target delivery schedule at agropakfarms.com.

STEP 02

Allocation & Inspection

Receive current feedlot lot inventory & schedule a Lahore office briefing or Punjab farm inspection visit.

STEP 03

MOU & Ration Plan

Execute supply/fattening terms with defined live-weight bands, FMD/HS vet clearance, and billing rates.

STEP 04

Weighbridge Dispatch

Each animal is digitally weighed, tagged, loaded onto clean transport, and billed strictly on verified weight.
